With the ability to deliver high quality SoundBridge audio and multiple video streams, including mobile and webcam, the core of the puzzle is video. In 2017, apple showed off a new feature that'd be at the heart of its 4K 60p. DownloadThis draft is targeted towards classroom instruction (primary grade K-5 or high school). Please let me know if you have any questions. I'd love to help in other ways and will happily continue to update until the draft is complete. dont know if any of this is going to be helpful but check out how the pedagogy views the teaching & learning of music.. nice how the notation and the musical notation is extremely applicable to the teaching and learning of music... I'm not actually interested in helping with this... just something I found useful Thanks. I've heard it's been revised quite a bit. I've heard the music notations is so successful at capturing and representing the music that it's integrated in more school curricula. The only one I really know is the Music Math Curriculum which uses the notation and the notation is 100% on the page so there is no confusion between notation and numbers... which is coolQ: How can I get a list of all report parameters using the Reportviewer ActiveX control? I've been looking through documentation on this for a while now, and can't seem to find what I'm looking for. This should be simple for many of you guys. My goal is to be able to programmatically add the parameters for a report to be able to edit them. I'm using ASP.NET with C#. The Reportviewer control in c# has the params and datasource properties for the report parameters. However, I can't find any property or any way to add the list of parameters to the report itself. I would just like to get an idea of how this might be accomplished, or if there is a better way of doing it. Note: I am a beginner. I'm doing
